

One offs from medicalpicture!

Whether photo, illustration or special photography – your healthcare topic in medicalpicture® quality

150 image authors await your request. Should your marketing be uniquely illustrated? Our image authors work in large part exclusively for medicalpicture®: photographers, illustrators and scientists who render healthcare topics with medical competency. Thus, we are able to quickly respond to your special image requirements with the right author. An original from medicalpicture® is always a good value – take a look at our example fees. We are able to carry out photo productions in our own studio or at your location upon request. We are happy to provide a custom quote at a moment's notice.

Insights into medicalpicture® custom productions

3D graphics

Big advantage: a 3D graphic behaves like a real model – it is accessible from virtually any angle. Additional perspectives and variations are cost-effective.

For example: angiogenesis – how does cancer grow?

Production costs: 3,500.00 EURO**

Photography

medicalpicture® features 3 large subject areas: man from the inside, man from the outside including all diseases, enhancements, monstrosities, and stills from A-Z in photography, SEM, microphotography all captured by trained experts.

For example: particulate matter under the microscope

Production costs: 1,600.00 EURO**

Illustration

medicalpicture® works with highly competent technical illustrators in medical fields, particularly in human anatomy and physiology. All graphics are verified by medical image editors. So, the heart beats in the right place.

For example: the heart – anatomy

Production costs: 1,800.00 EURO**

Digital compositing

Everything genuine? Everything just the way you want it! We turn your ideas into reality: studio photography meets the virtual world of images.

For example: real surgeon, fictional plasma screen

Production costs: 2,300.00 EURO**

www.medical-picture.com

What does arthrosis look like from the inside out? Can this color kaleidoscope be simple Vitamin C? And, which is stronger: gastric acid or a razoblade?

All this and more is available at www.medical-picture.com, the picture agency on the Internet for medicine, health, pharmacy, research, science and wellness.

We offer more than just photos: colorful microphotographs, medical anatomy illustrations in the greatest detail, historical photographs of capacities and monstrosities. Quick access using free-form text search guarantees surprising insights online and all without separate registration.

At the heart of the healthcare market - right from the start

The scientific advisory board with personalities from various medical/scientific disciplines assure our technical reputation in addition to an editorial staff of medical professionals.

medicalpicture GmbH, founded in 2002, is part of one of the strongest healthcare corporate groups in Germany, DocCheck AG. medicalpicture® operates the fastest growing, web-based image database in Germany with more than 100,000 images. Nearly all image authors nationally and internationally are represented on an exclusive basis. In addition to licensing image media, medicalpicture® offers solutions and services for image management.
